			ART UNIT	PAPER NUMBER
			2193	
			MAIL DATE	DELIVERY MODE
			10/17/2007	PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No.	Applicant(s)	
	10/823,324	SIMPSON, FRANKLIN FULTON	
	Examiner	Art Unit	
	Jason Mitchell	2193	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 August 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1 and 17-48 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1 and 17-48 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. Claims 1 and 17-48 are pending in this application.

Response to Arguments

2. **Applicant's arguments have been fully considered but they are not persuasive.**
3. Applicant asserts Viswanath does not appear to disclose "providing a custom management capability through the MBean over the management domain" because Viswanath discloses an administration framework which uses JMX and MBeans.

First it is noted that the Applicant has not indicated how Viswanath's used of JMX (Java Management Extensions) and MBeans (Managed Beans) to provide an administration framework is distinguished from the claimed management capability provided through MBeans. Consequently, Applicant's arguments fail to comply with 37 CFR 1.111(b) because they amount to a general allegation that the claims define a patentable invention without specifically pointing out how the language of the claims patentably distinguishes them from the references.

Second, Viswanath explicitly discloses his administration framework "may be used to manage and monitor the generated beans" (col. 3, lines 25-29). Accordingly, as would be recognized by one of ordinary skill in the art, Viswanath's administration framework is analogous to a management framework and provides management capability.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. **Claim 42 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.**

6. Claim 42 recites the limitation "the MBean information structure" in lines 1-2.

There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. **Claims 1, 17-28, 34-39, 43-44 and 48 are rejected under 35 U.S.C. 102(e) as being anticipated by US 7,206,827 to Viswanath et al. (Viswanath).**

9. **Regarding Claims 1:** Viswanath discloses a computer-readable medium containing instructions stored thereon, wherein the instructions comprise:

receiving an MBean definition file in an XML format (col. 15, lines 33-35 “a meta-information file may be generated by users”; col. 20, lines 9-10 “the management beans 212 generated ... may be MBeans”; col. 3, lines 41-43 “XML by be used ... for the meta-information”)

generating an MBean jar file from the MBean definition file (col. 10, lines 3-5 “deployed applications may be stored ... as jar files”), wherein the MBean jar file includes a tag for the MBean and a tag for each attribute, operation, and potential notification issued by the MBean (col. 9, lines 14-20 “meta-information 226 ... includes descriptions of elements or properties, and there attributes, of the persistent store”);

placing the jar file in a predetermined directory within a managed server in a management domain (see the Table in col. 10; col. 20, lines 9-10 “the management beans 212 ... may be MBeans”; Note that MBeans contain a ‘persistLocation’ descriptor field indicating The fully qualified directory where files representing the MBean should be stored.); and

providing a custom management capability through the MBean over the management domain (col. 19, lines 66-67 “The management beans 212 may expose the management interface to the external world”).

10. **Regarding Claim 17:** Viswanath discloses the management domain is a collection of distributed servers that are managed as a unit (see the Table in col. 10).

Art Unit: 2193

11. **Regarding Claim 18:** Viswanath discloses the custom management capability tracks changes to MBeans throughout the system (col. 4, lines 46-50).
12. **Regarding Claim 19:** Viswanath discloses each server node has an MBean server (Fig. 2, Administrationserver 200).
13. **Regarding Claim 20:** Viswanath discloses the custom management capability provides an API for providing management services in the management domain (col. 19, lines 66-67).
14. **Regarding Claim 21:** Viswanath discloses the custom management capability is customized by a user by adding schema attributes and extended persistence features (col. 12, lines Configuration API 222 functionality may include ... change management (e.g. add, update, delete, set)").
15. **Regarding Claim 22:** Viswanath discloses the custom management capability is packaged as a framework with multiple MBeans, which a security provider can extend (col. 5, line 55 "dynamic administration framework").
16. **Regarding Claims 23-25:** Viswanath discloses an MBean is accessed through a dynamically generated type MBean stub providing access to a java object (col. 10, lines 29-50).

17. **Regarding Claim 26:** Viswanath discloses a factory model is provided for creating MBean instances (col. 12, lines 19-23 "factory for creating the beans").

18. **Regarding Claim 27:** Viswanath discloses MBean delegates are derived from an existing MBean (col. 17, lines 10-12 "the configuration beans 210 may inherit from a common class").

19. **Regarding Claim 28:** Viswanath discloses MBeans that are declared to be persistent are automatically saved to a repository (Fig. 2, Persistent Store 204).

20. **Regarding Claim 34:** Viswanath discloses a local MBean server handles read attribute requests and MBean creation and deletion requests for server specific MBeans (col. 17, lines 36-39 "API 222 may provide a generic interface to manage (e.g. create, read ... write and/or delete) ... the generated configuration beans 210").

21. **Regarding Claim 35:** Viswanath discloses an MBean Server Proxy routes read access to an appropriate server and MBean instance within the appropriate server and routes write accesses to the corresponding MBean instance on the administration server (Fig. 1A, Web Server 104; Application Server 108A-B).

Art Unit: 2193

22. **Regarding Claim 36:** The computer-readable medium of claim 1, wherein scope of an MBean is a set of locations at which the MBean is available (col. 2, lines 37-40 "Components may be deployed on different servers in a network"), and wherein an administration server contains a copy of all sharable MBeans located in a management domain (Fig. 3, Generated managed beans 212).

23. **Regarding Claim 37:** Viswanath discloses changes to an MBean are propagated from an administration server to all servers within the scope of the MBean (col. 16, lines 4-18 "changes may be ... set to one or more other application servers 202").

24. **Regarding Claim 38:** Viswanath discloses applications and servers must go to a particular server to read a server-specific MBean (col. 15, lines 17-18 "In one embodiment, user applications may not be deployed to an administration server 200").

25. **Regarding Claim 39:** Viswanath discloses all MBeans residing on a managed server are stored in the managed server's local repository (Fig. 4 Generated beans 250B-C) in addition to the administration server's repository (Fig. 4, Generated beans 250A).

26. **Regarding Claim 43:** The computer-readable medium of claim 36, wherein a request for a server specific MBean may be handled by any MBean server in the

Art Unit: 2193

management domain (col. 16, lines 53-57 "the generated administration framework may provide a unified view and access ... to administration information").

27. **Regarding Claim 44:** Viswanath discloses accessing a server specific MBean is performed through a logical canonical server corresponding to a managed server that the server specific MBean resides upon (col. 15, lines 63-65 "The administration framework may provide a single point of access for core server, administration and application configuration").

28. **Regarding Claim 48:** Viswanath discloses an administration server handles attribute writes and MBean creation and deletion requests for sharable MBeans (col. 17, lines 36-39 "API 222 may provide a generic interface to manage (e.g. create, read ... write and/or delete) ... the generated configuration beans 210").

Claim Rejections - 35 USC § 103

29. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

30. **Claim 29 is rejected under 35 U.S.C. 103(a) as being unpatentable over US 7,206,827 to Viswanath et al. (Viswanath) in view of US 5,212,784 to Sparks (Sparks).**

31. **Regarding Claim 29:** Viswanath discloses MBeans are stored in separate files (col. 10, lines 3-6 “applications may be stored ... as jar files”) but does not disclose MBeans are shadowed for failsafe writes.

32. Sparks teaches files that are shadowed for failsafe writes (col. 6, lines 47-49 “The primary controller 2 continues to mirror or shadow data”).

33. It would have been obvious to one of ordinary skill in the art at the time the invention was made to shadow Viswanath’s stored MBeans “If additional reliability and security are desired” (Sparks col. 6, lines 39-43).

34. **Claims 30-33 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 7,206,827 to Viswanath et al. (Viswanath) in view of official notice.**

35. **Regarding Claims 30-33:** The claims recite including various specific data in the tags.

36. Official Notice is taken that each of the datum were known and used in the art at the time of invention. Consequently, it would, at least, have been obvious to one of ordinary skill in the art at the time the invention was made to include this data in

Art Unit: 2193

Viswanath's tags in order to provide access to the data so that it can be accessed and used in the art recognized manner.

37. Claims 40-42 and 45-47 are rejected under 35 U.S.C. 103(a) as being unpatentable over US 7,206,827 to Viswanath et al. (Viswanath) in view of US 6,788,980 to Johnson (Johnson).

38. Regarding Claims 40-42: Viswanath discloses properties of an MBean may be specified in the definition file (col. 15, lines 5-9 "The meta-information 226 may be used ... to generate components"), upon creation (col. 15, lines 33-35 "a meta information file may be generated by users") and in an information structure (col. 15, lines 1-3 "all elements or properties of the persistent store 204 may be represented in one meta-information 226 file") but does not explicitly define one of these properties as a scope.

39. Johnson discloses managed objects with scope properties (col. 23, lines 17-18 "supports the implementation of naming scopes, i.e., limiting the visibility of names").

40. It would have been obvious to one of ordinary skill in the art at the time the invention was made to include scope as one of the properties specified by Viswanath in order to support the implementation of naming scopes as taught by Johnson (col. 23, lines 17-18).

Art Unit: 2193

41. **Regarding Claim 45:** Viswanath discloses requesting an MBean (col. 19, lines 20-23 “a query mechanism”) but does not disclose when a request is received for an MBean not available on a MBean server, the MBean server calls a method that returns a list of MBeans in a management domain or a specific subset of the management domain.

42. Johnson teaches in response to a request, returning a list of MBeans in a management domain or a specific subset of the management domain (col. 23, lines 17-18 “rule based specification of the name delimiting character; locates an object based on a “longest fit” because (a) not all parts of an object name are globally known”).

43. It would have been obvious to one of ordinary skill in the art at the time the invention was made to in response to a request return a list of partial matches to Viswanath’s query (col. 19, lines 20-23) because “not all parts of an object name are globally known” (Johnson col. 23, lines 17-18).

44. **Regarding Claim 46:** Viswanath discloses the MBean server uses user-provided information including a provided object name pattern to qualify a search of the list of MBeans in the management domain (col. 19, lines 20-23 “a query mechanism may be provided that uses a query language to access the persistent store 204”).

45. **Regarding Claim 47:** Viswanath discloses an administration server contains a list of server specific MBeans in addition to shared MBeans (col. 16, lines 53-57 "a unified view and access").

Conclusion

46. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.

47. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jason Mitchell whose telephone number is (571) 272-

Art Unit: 2193

3728. The examiner can normally be reached on Monday-Thursday and alternate Fridays 7:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Meng-Ai An can be reached on (571) 272-3756. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
